

SWAPNIL BABLADKAR

Lead Infrastructure Engineer

Pune, India | +91-9921092700 | swapnil.babladkar@gmail.com | linkedin.com/in/swapnilbabladkar

SUMMARY

Lead Infrastructure / DevOps Consultant with 9+ years running mission-critical AWS/Kubernetes platforms, and 2+ years hands-on building production AI/LLM infrastructure — MCP servers, RAG pipelines, vector stores, and embedding pipelines — for GenAI-enabled engineering teams. Track record: 99.99% SLA compliance, 35% MTTR reduction, 10+ client engagements led.

CORE TECHNICAL SKILLS

AI / LLM Infrastructure: MCP (Model Context Protocol) server design & deployment, RAG pipeline architecture, vector stores, embedding pipelines & caching, LLM integrations, LLM-driven observability & RCA automation, AI-ready platform provisioning

Cloud & IaC: AWS, Azure, EKS, Terraform, Kubernetes, Docker, Ansible, Puppet, Chef, Python, Bash, load balancing, autoscaling, cost optimisation

CI/CD & DevOps: GitHub Actions, Octopus Deploy, Jenkins, ArgoCD, GitLab CI, CircleCI, GitOps, release automation, infra pipeline design

Monitoring & Observability: Prometheus, Grafana, Datadog, ELK Stack, OpenSearch, Squadcast, PagerDuty, New Relic, MTTR/SLA management

Data & Leadership: PostgreSQL, Redis, RDS tuning, vector databases • Platform strategy, Infra CoP leadership, DevOps/SRE team leadership

PROFESSIONAL EXPERIENCE

Lead DevOps Consultant

March 2026 - Present

Equal Experts

- **AI Platform:** Lead platform engineering for GenAI applications, building and operating the shared infrastructure that supports multiple LLM-powered products.
- **RAG & MCP:** Designed and deployed RAG pipelines integrating vector stores and embedding pipelines to power grounded, production-ready GenAI features; authored and deployed MCP (Model Context Protocol) servers to AWS for centralized logging, monitoring, and observability.
- **Automation:** Enabled automated, self-service platform deployments using MCP-driven tooling, reducing manual provisioning effort and accelerating environment setup for GenAI workloads.
- **Central Platform:** Built and operate a central infrastructure platform — Terraform automation, EKS, GitHub Actions, and Octopus Deploy — giving multiple engineering and AI teams self-service, standardised app deployment instead of per-team, one-off pipelines.

Lead Infrastructure Consultant

January 2024 - February 2026

Thoughtworks

- **Leadership:** Tech Lead for a major European airline; led DevOps and SRE teams supporting mission-critical AWS and Kubernetes applications, achieving 99.99% SLA compliance and cutting MTTR by 35%.
- **AI Enablement:** Pioneered AI-first SRE/DevOps tooling (LLMs + vector databases + observability data) for automated RCA and anomaly detection, cutting manual toil by 30%; drove AI-ready infrastructure practices across 10+ client engagements as head of the Infrastructure Community of Practice.
- **Infrastructure & IaC:** Designed and automated AWS infrastructure using Terraform, custom modules, and Python Lambdas, optimising ECS clusters (25% utilisation improvement) and enhancing RDS performance, cutting manual operations by 30%.
- **CI/CD & Incident Response:** Built CI/CD pipelines with CircleCI and Jenkins; established monitoring and incident-response frameworks (Datadog, PagerDuty, New Relic, ELK, EKS), reducing deployment lead time by 40% and P1/P2 incidents by 25%.
- **Platform & Cost Optimisation:** Delivered infrastructure accelerators and reusable modules, cutting environment provisioning time by 40% and enabling cost-efficient, secure, production-ready deployments; scaled IaC, GitOps, cloud security, and cost-optimisation best practices across the Infrastructure Community of Practice.

Senior DevOps Engineer

January 2023 - December 2023

Tech Prescient

- Managed full-lifecycle AWS infra (VPC, Lambda, API Gateway, Cognito, CodePipeline); Terraform IaC + Datadog/CircleCI cut provisioning time 30%, costs 20%, deployment failures 15%, and improved deploy speed 40%.

Senior DevOps Engineer

May 2022 - December 2023

Nirmata Inc

- Spearheaded enterprise Kyverno policies for multiple clients, cutting security incidents 30% and improving compliance audit scores 15%; contributed to open-source Kyverno (Golang).

Senior Solution Integrator

September 2017 - May 2022

Ericsson Inc

- Deployed Ericsson's Cloud Native Solution on bare-metal Kubernetes (Ansible-automated VM procurement), cutting provisioning time 40% and MTTR 20%; migrated 10+ lakh subscribers to Cloud Native with minimal downtime.

EDUCATION

B.Tech in Information Technology — Vishwakarma Institute of Technology | Aug 2013 - May 2017 | GPA: 8.0/10
